PROTOTYPING PROCESS

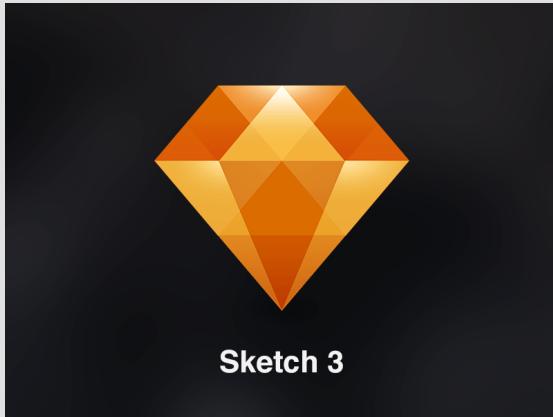

Methods

The image shows a digital wireframing or design tool interface with a toolbar at the top containing various icons for creating symbols, searching, transforming, rotating, flattening, masking, scaling, and performing geometric operations like Union, Subtract, Intersect, and Difference. Below the toolbar, there are five mobile phone screen prototypes arranged vertically, each labeled with its purpose:

- Account Creation:** Shows a "Sign In" screen with a logo and a "Create Account" button, followed by several screens for profile creation, including fields for name, email, password, and birthdate.
- Community Exploration:** Shows a "My Communities" screen displaying a grid of community thumbnails.
- Add a List Item:** Shows a "Your List" screen where users can add items to a list, with a keyboard visible at the bottom.
- Respond to an Invite:** Shows an "Invitation" screen listing plans and responses for four different invitees.
- Make an Invitation:** Shows a "List Item" screen where users can invite others to join their group, with a keyboard visible at the bottom.

- Sketch:
 - Layout UI elements
- Marvel:
 - Transitions/animation
 - Overlay on phone
- Photoshop:
 - Icon design

What we liked

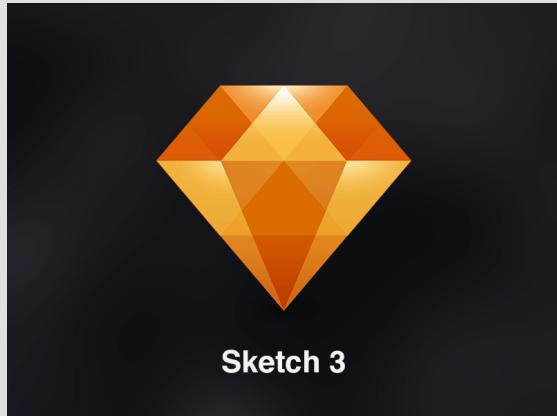

- Easier learning curve than Photoshop or Illustrator
- Infinite canvas size
- Built in screen sizes and UI elements

- Looks like a real app
- Import directly from Sketch
- Easy to share, project hosted online

Limitations

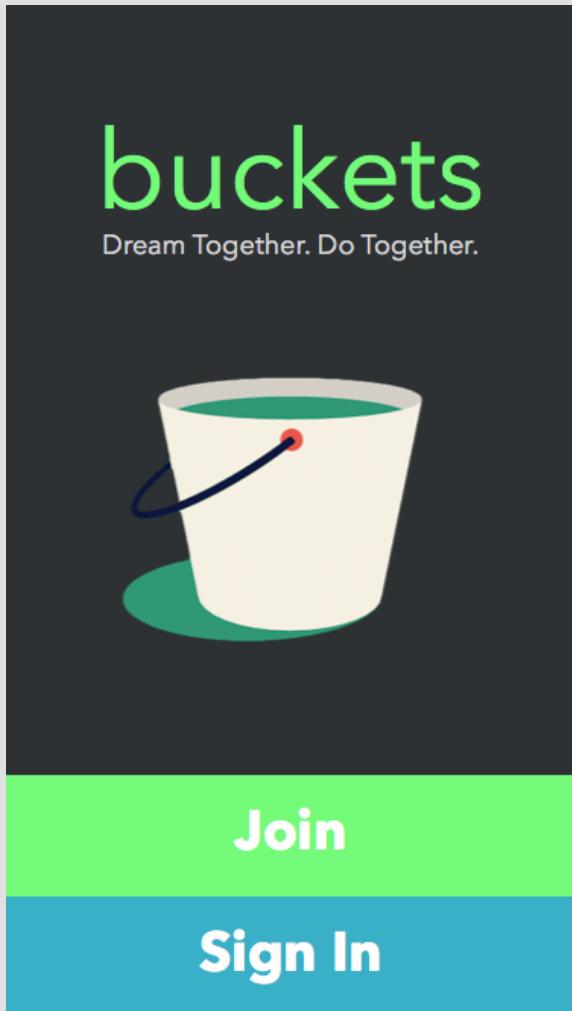

- Initial lack of experience
- Missing some UI elements (standard button)
- Static content (lots of copy/paste)
- All data hard-coded

- Pay for team collaboration
- Manually set transition/animations
- Static content (can't type)
- All data hard-coded

PROTOTYPE

Login/Signup

Welcome to Buckets

Sign Up with Facebook
Don't worry, we won't post anything for you.

or

Email:
example@domain.com

Password:

Get Started

This screen shows the initial login/signup flow. It starts with a welcome message and a bucket icon. It offers users the option to sign up with Facebook or to enter their email and password manually. A prominent 'Get Started' button at the bottom is intended to guide users through the process.

Welcome Back

Login with Facebook

or

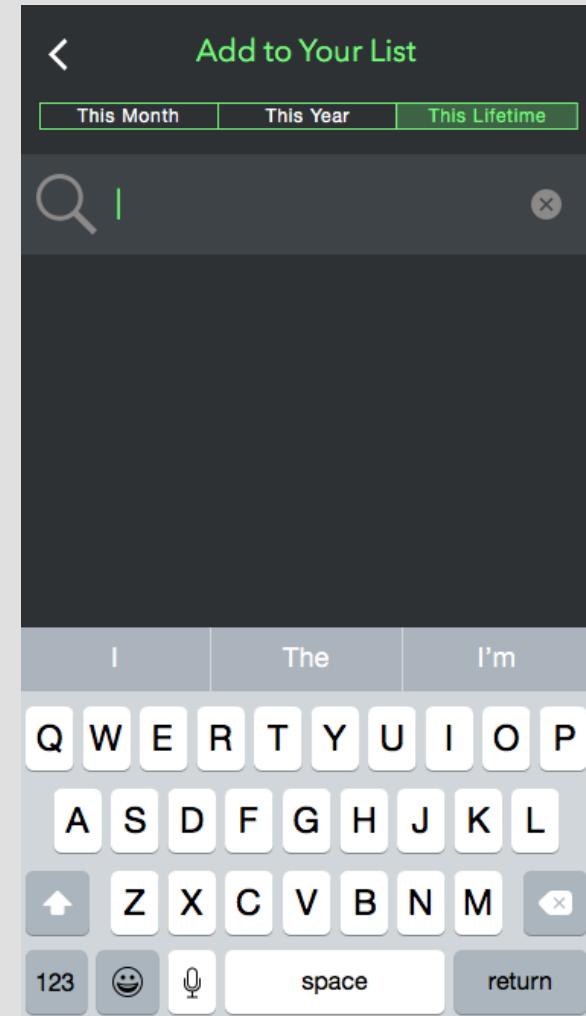

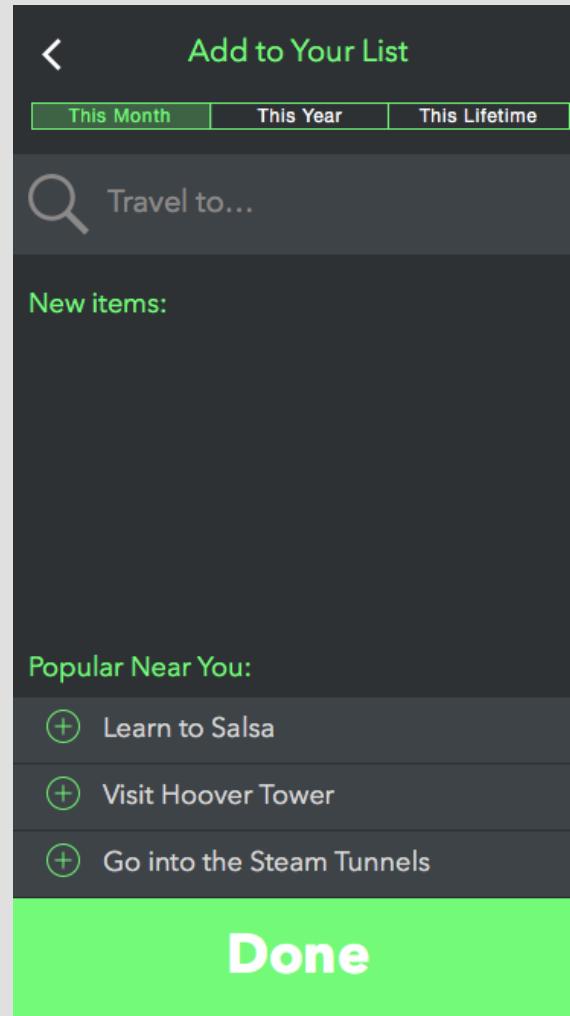

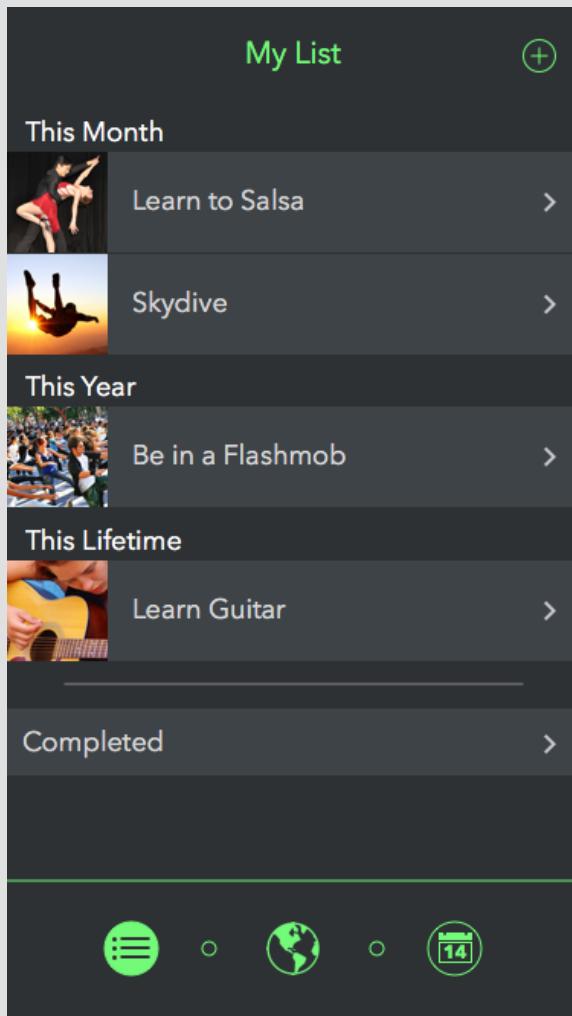

Email:
example@domain.com

Password:

Sign In

This screen shows the continuation of the login process for existing users. It features a 'Welcome Back' message and the same bucket icon. It provides a 'Login with Facebook' option and manual entry fields for email and password. A final 'Sign In' button is at the bottom.

Task 1: Add to list

Click on +

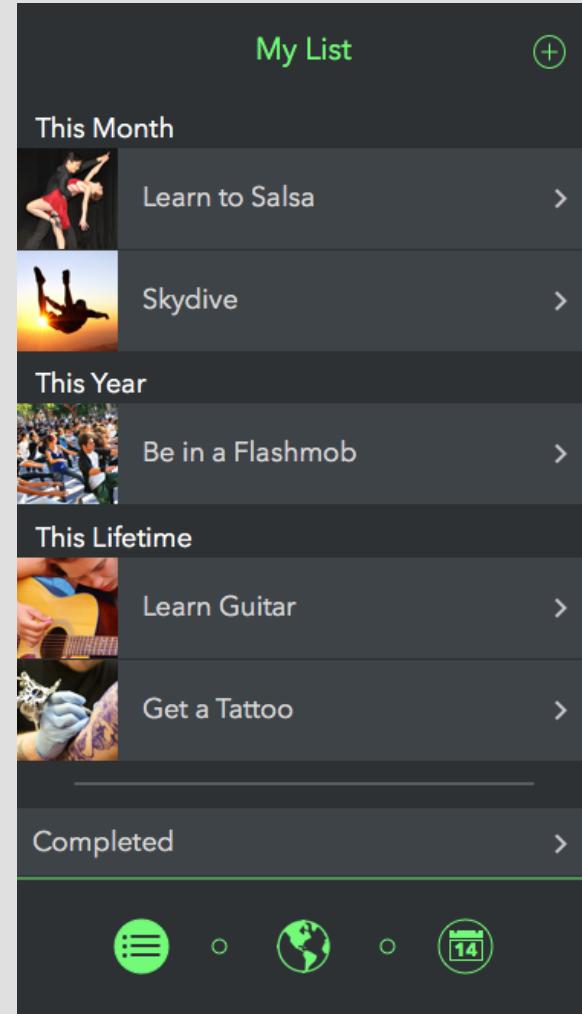

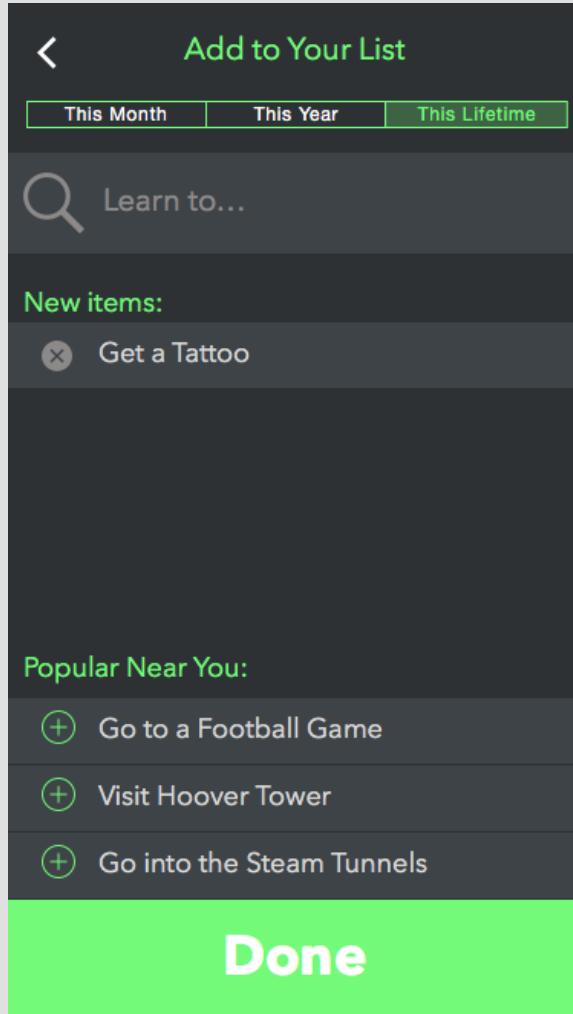

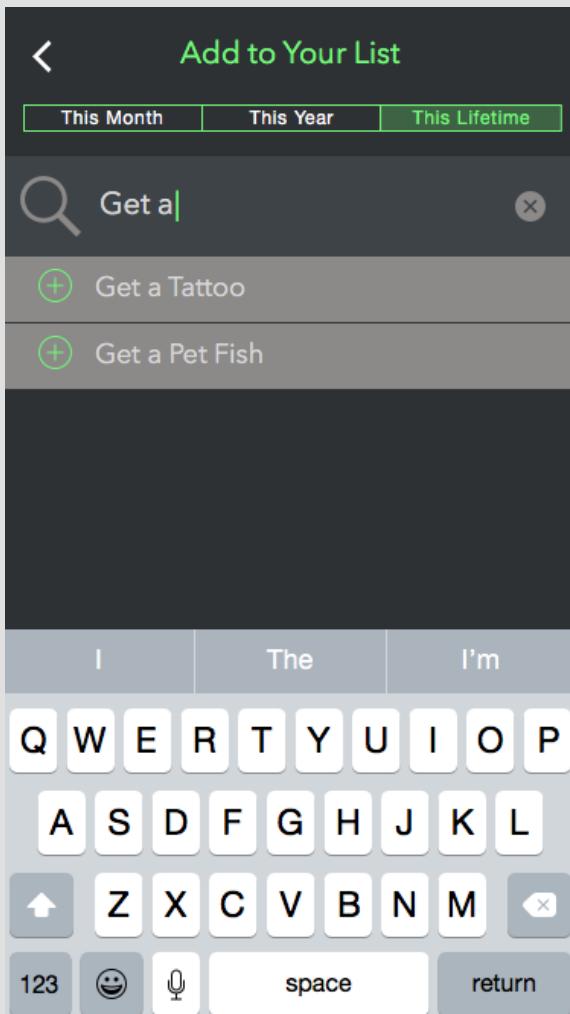

Click on

Start typing

Task 1: Add to list (cont.)

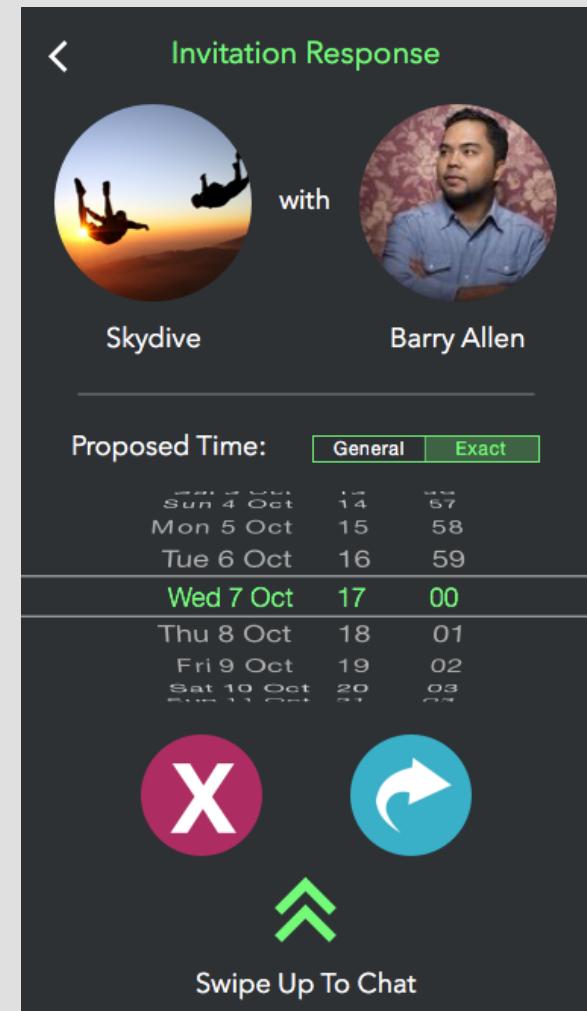

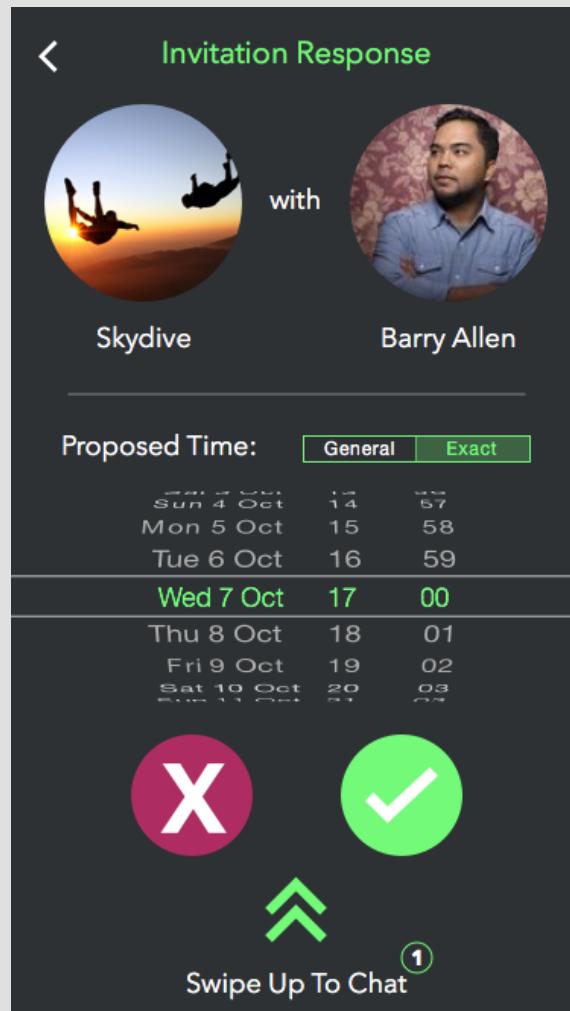

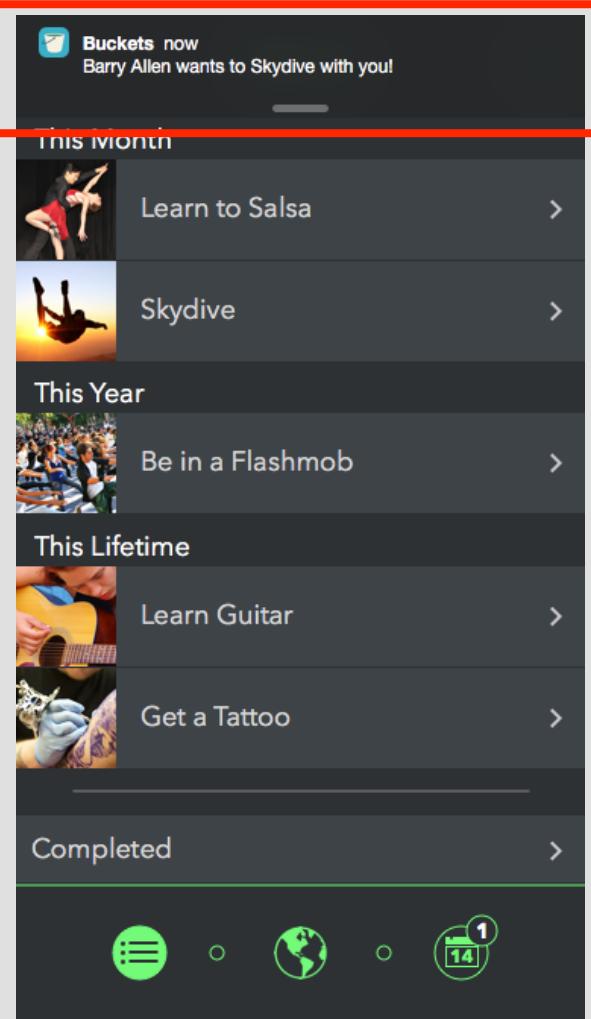

Autocomplete

Click done

Your list

Task 2: Respond to Invitation

Notifications

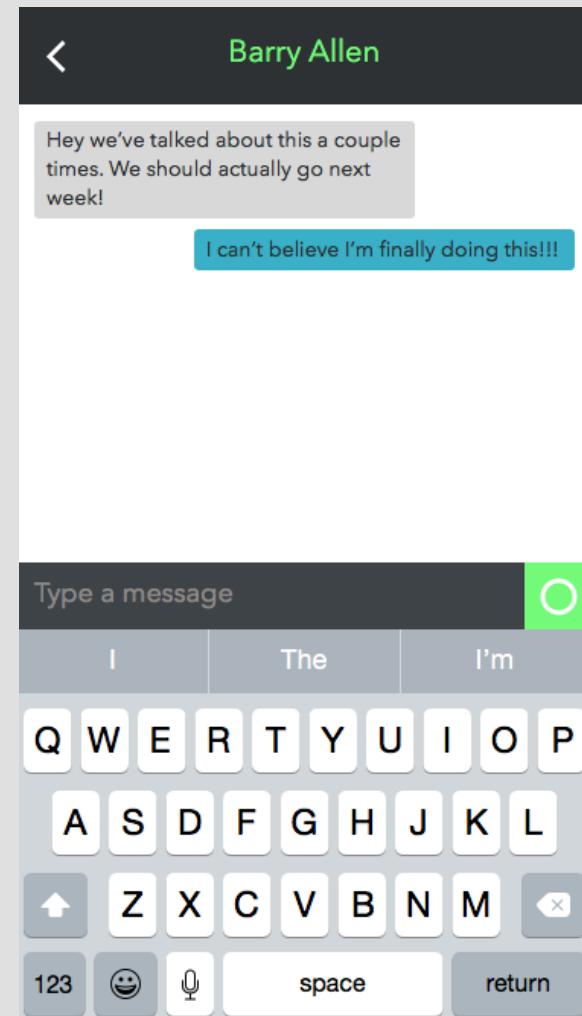

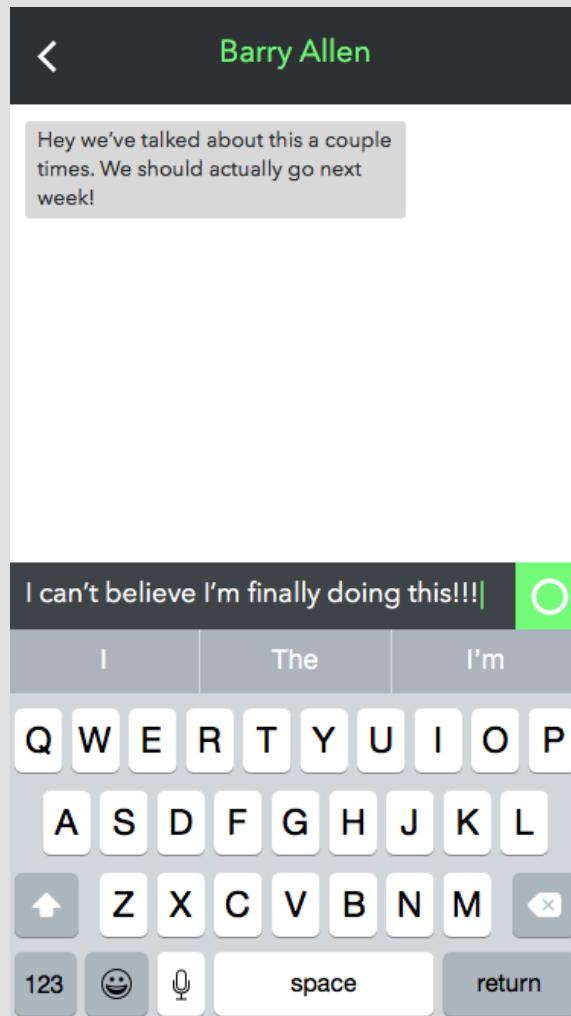

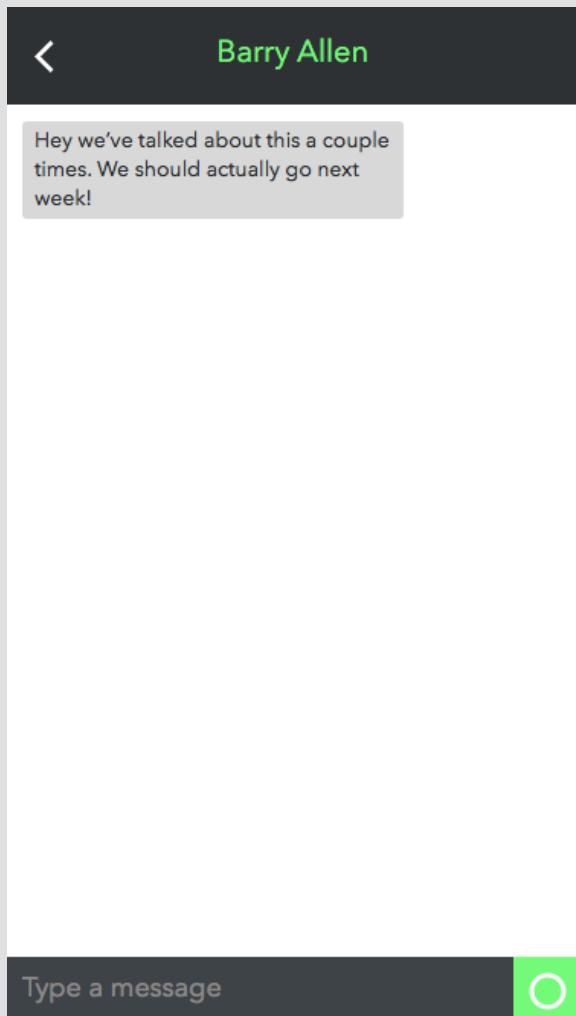

Invite

Propose new time
(optional)

Task 2: Respond to Invitation (cont.)

Initial invite message

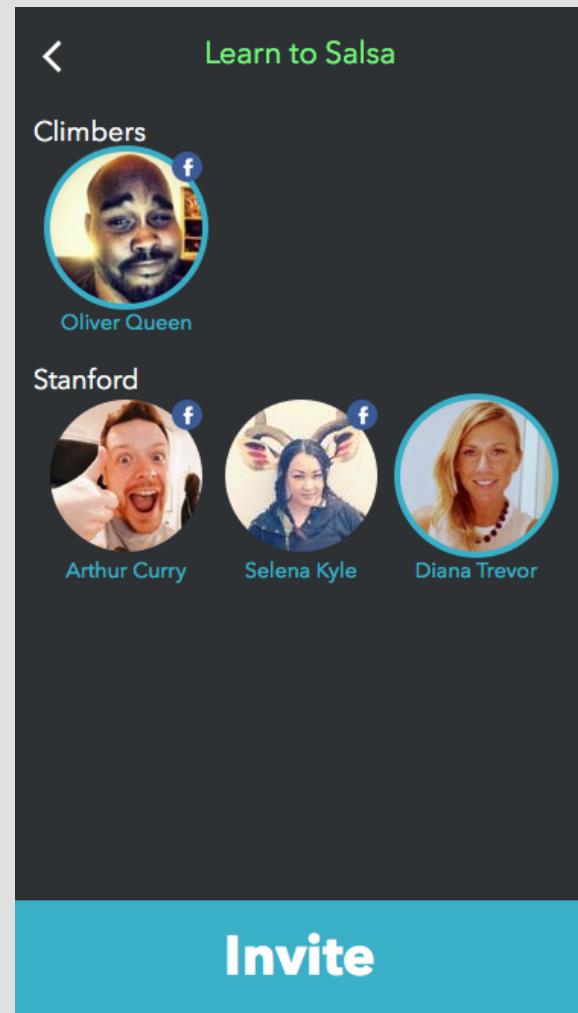

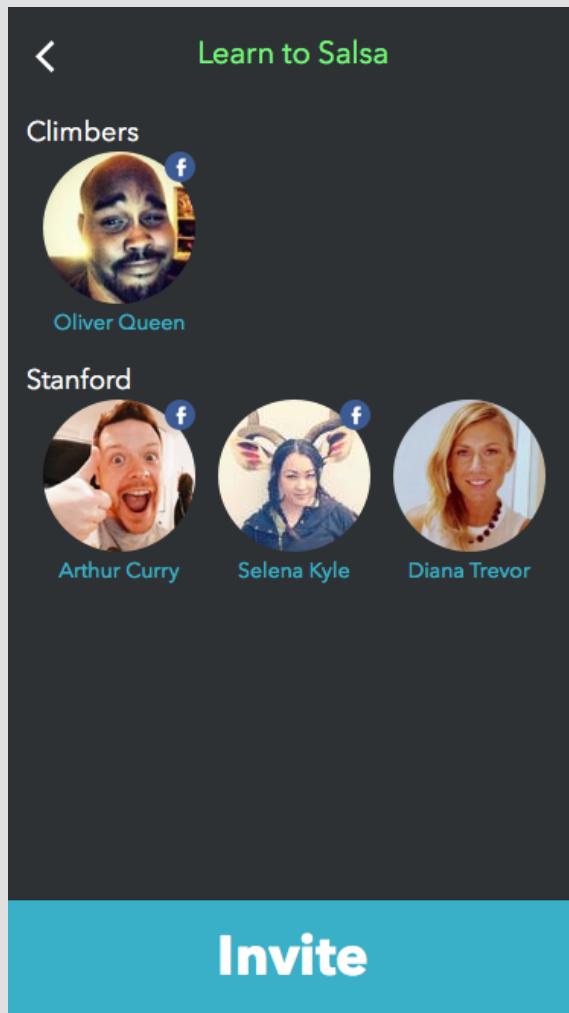

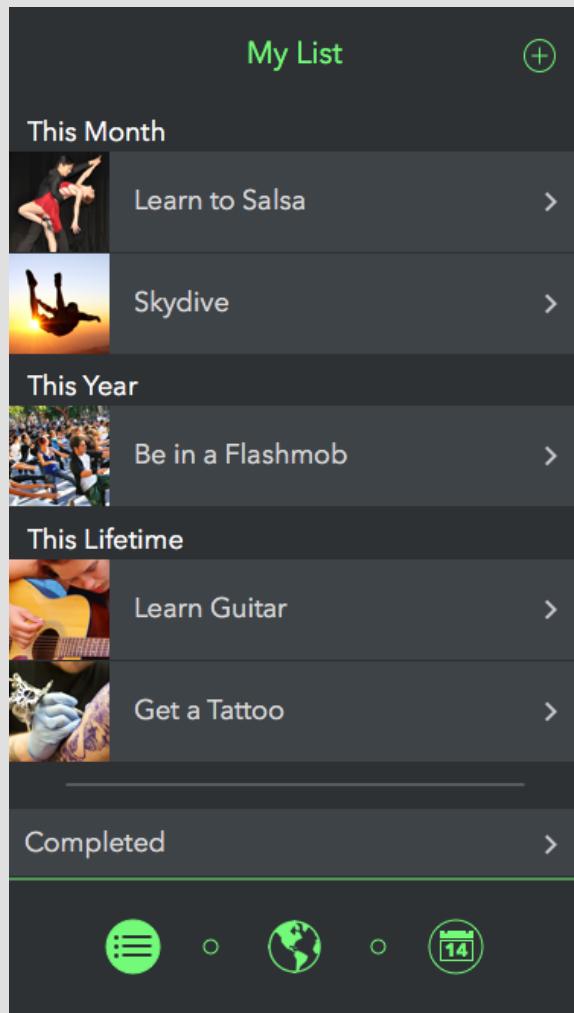

Type response

Send response

Task 3: Send an Invitation

Choose an activity

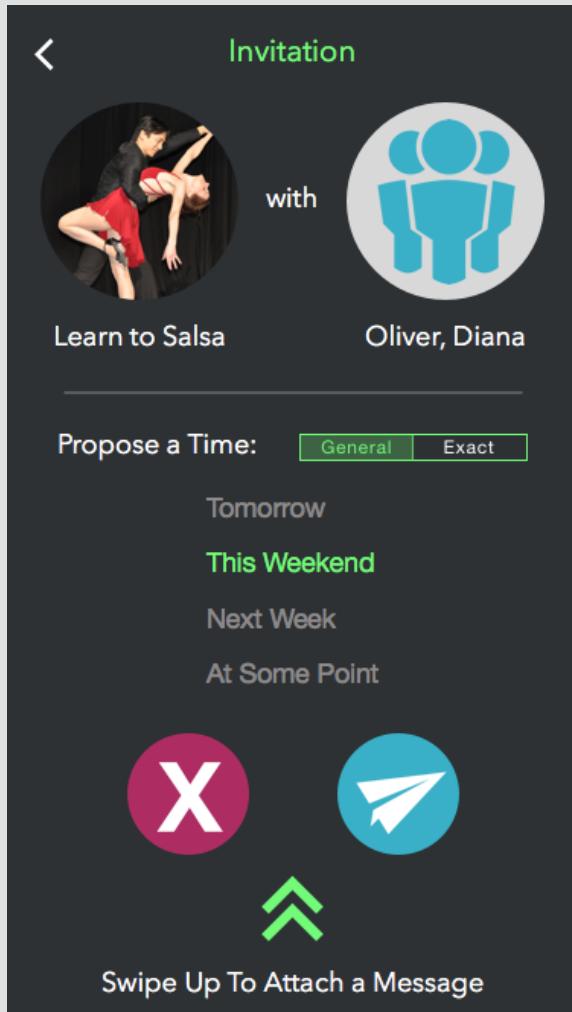

Choose people

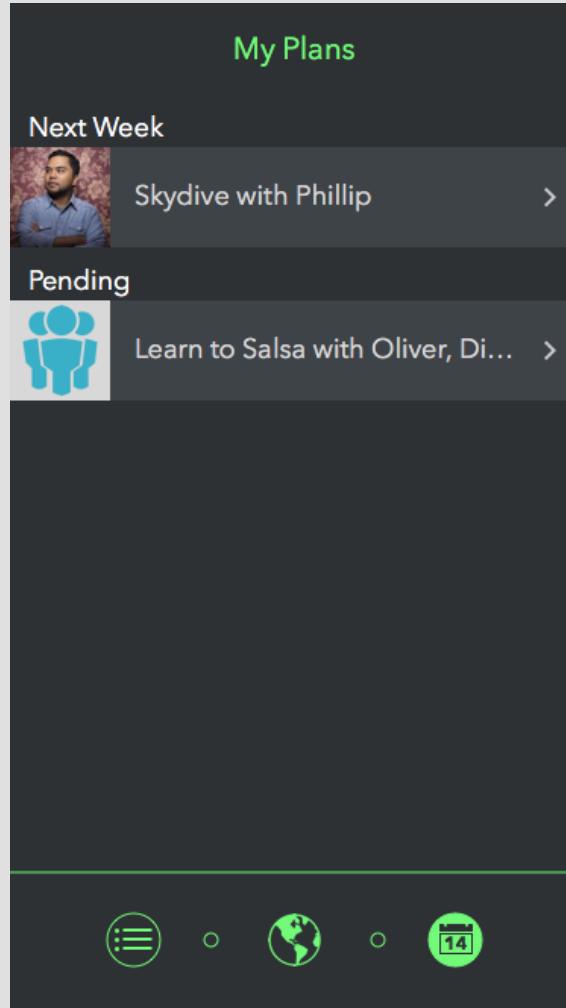

After choosing people

Task 3: Send an Invitation (cont.)

Choose a time and send

Go to your plans

Conclusion

- We tried to give users more options
- Unified color scheme across the app
 - Green = general
 - Blue = communities
